

Pitch Deck

Intelligent Data Quality Monitoring for
Modern Data Teams

Please reach out at:

+91-996-079-0196 ● hello@upshotideas.com

The Problem

30% of data issues are discovered after they reach business users.

Data teams spend **30-50%** of their time firefighting bad data.

Current tools are reactive, rigid, and miss the root causes.

Data Quality is Broken in the Modern Stack

The Solution

Meet Dragonfly: Autonomous Data Quality Monitoring

Empowered SMEs for on-the-fly anomaly check activation

Built for scale: Seamlessly integrates into your data pipeline for proactive prevention

Adjustable Data Confidence Rating to assess data reliability

How Dragonfly Works

Simple Four-Step Process

Step 01

Plug into modern data warehouses (Snowflake, Redshift, etc.)

Step 02

Analyze data visually and create checks without relying on engineering team

Step 03

Get anomaly notifications via Slack, email, or dashboard

Step 04

Identify failure patterns and resolve data issues faster than ever

Why Now

Timing is Everything

Explosion in data and AI usage: volume, velocity, and complexity

Rise of the hybrid cloud and multi-warehouse data stacks

Enterprises are demanding higher data trust and accountability

Market Opportunity

A \$8B+ Market with Expanding Scope

\$8B data observability market projected to reach by 2033

Adjacent expansion into data governance, lineage, and compliance

Target: Mid-to-large enterprises with mature data use cases

Traction

Early Validation & Rapid Growth

12 early adopters from automotive, martech and public facilities

274K+ data checks run monthly with 99% detection accuracy

Well integrated with AWS, GCP, and Snowflake ecosystems

Business Model

Flexible Pricing for Scalable Growth

Enterprise plans with self-hosting, SSO, and dedicated support.

Subscription-based SaaS: tiered by data volume and features.

Expansion revenue via additional connectors and services.

Business Model

Flexible Pricing
for Scalable
Growth

Feature	Dragonfly	SodaSQL	Monte Carlo	Great Expectations

Go-To-Market Strategy

Focused, Phased Expansion

Start with data-first companies (Series B+ tech startups).

Scale via content, partnerships, and strategic integrations.
